

Meet our
partner

Funded by the European Union Horizon Europe research and innovation programme under Grant Agreement No. 101104204 (REINFORCE). Views and opinions expressed are, however, those of the author(s) only and do not necessarily reflect those of the European Union or CINEA. Neither the European Union nor the granting authority can be held responsible for them.

Who we are and what we do in REINFORCE

At NUTAI, we develop advanced industrial automation solutions using robotics, machine vision, AI, and sustainable energy technologies. We lead turnkey projects to optimize industrial processes and collaborate with leading companies in automotive, sustainable mobility, and energy. We also create our own products, focusing on digital transformation, sustainability, and technological innovation.

Who we are

In the REINFORCE project, NUTAI has a fundamental role that includes leadership in the design of the layout of the pilot plant's disassembly station. It is also a developer of automated systems for the safe and efficient disassembly of batteries, a researcher in computer vision for defect detection in battery modules, and a researcher on different battery typologies and modules, as well as the preparation of tests with a bidirectional power source.

Our role in REINFORCE
